Style Analysis

With the core design concept of "transmitting Eastern aesthetics and interpreting modern elegance", this product line combines traditional Chinese cultural elements with modern home design to create curtain products that possess both classic charm and modern practicality.

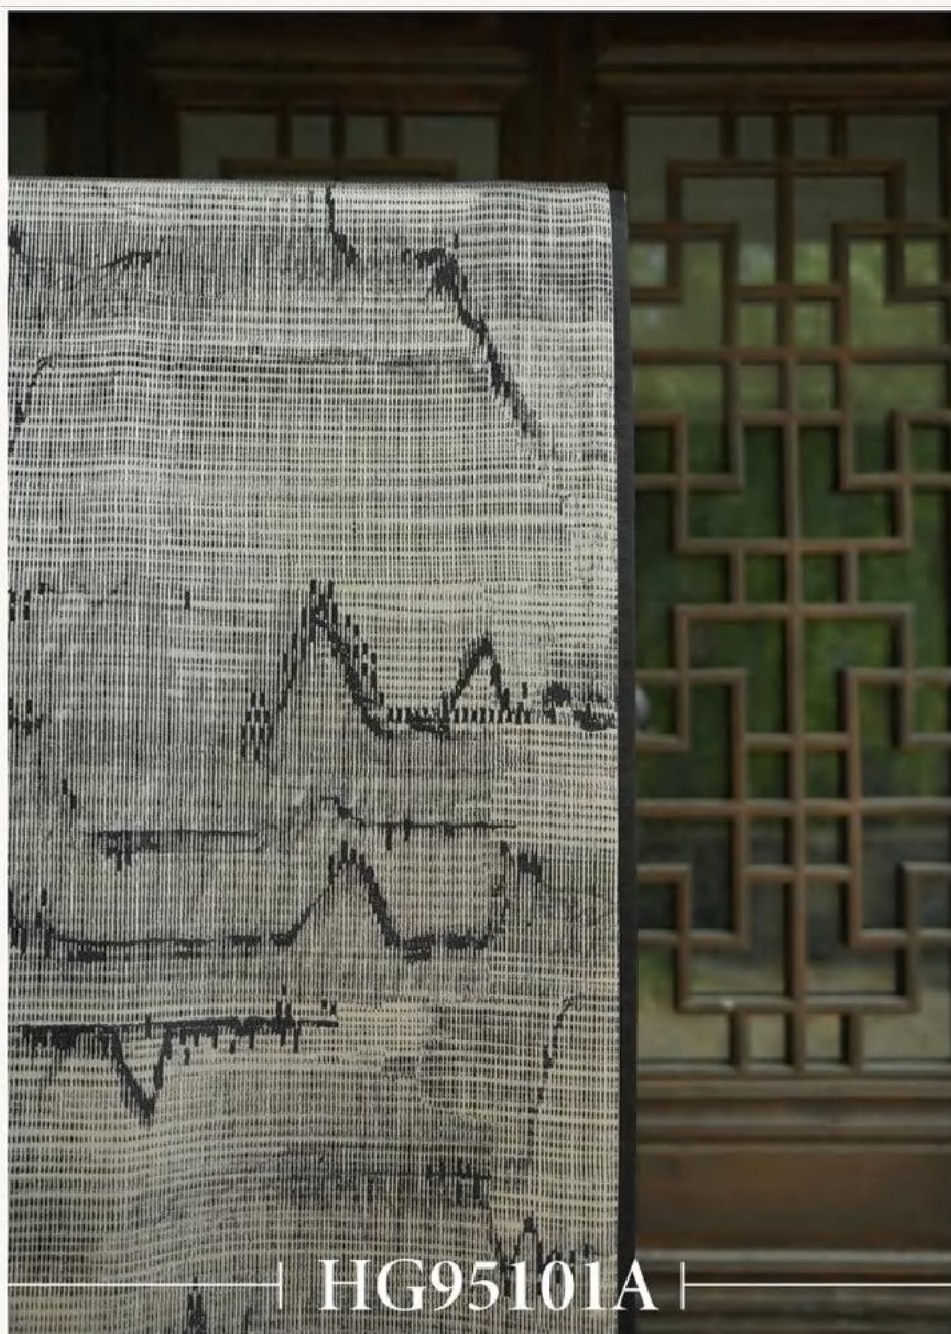

The pure white micro-cement walls and the bamboo-woven floor exude a natural charm. The tea table is adorned with Taomin glazed tea bowls and ceramic water basins with lively fish patterns. The slightly oriental-style curtains gently sway, and the bamboo-strip and water-flow patterns create a serene and meditative atmosphere. The traditional Chinese fabric perfectly complements the minimalist tone of the tea room.

Spatial Adaptation

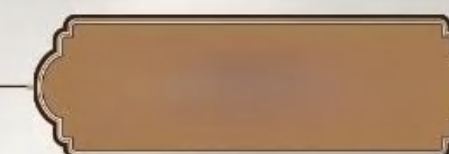

The light brown wooden wall paneling, the solid wood flooring, and the textured curtains all contribute to creating a warm and natural atmosphere. The texture of the curtains is like flowing Eastern ink, infusing the simple living room with a sense of story.

Relief art is not only a form of visual art, but also a cultural carrier. It carries history, culture and the memory of society reflects people's aesthetic concepts and spiritual pursuits.

The classic herringbone pattern is combined with the innovative overlay design. The herringbone pattern, as one of the classic patterns, has always exuded a sense of nobility and elegance throughout history.

This fabric is themed with the herringbone pattern. The interweaving and overlay of the layers add a sense of three-dimensionality and layering to the fabric.
